

Division in groups

Divide by making groups

Number of shapes = ____

Number of groups = ____

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Number of shapes = ____

Number of groups = ____

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Number of shapes = ____

Number of groups = ____

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Number of shapes = ____

Number of groups = ____

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

Number of shapes = ____

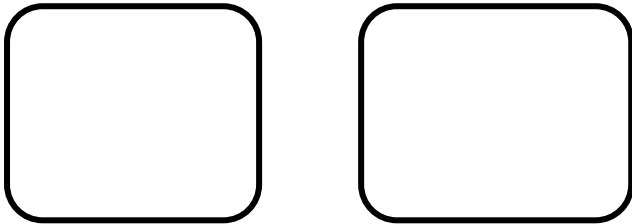

Number of groups = ____

$$\underline{\quad} \div \underline{\quad} = \underline{\quad}$$

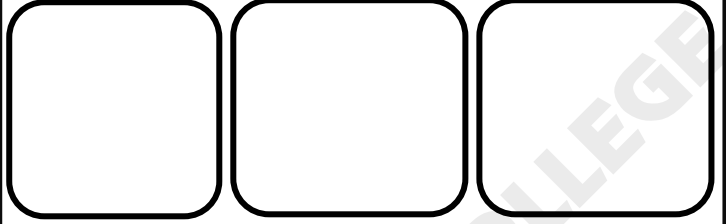

Division

Draw the shapes as directed

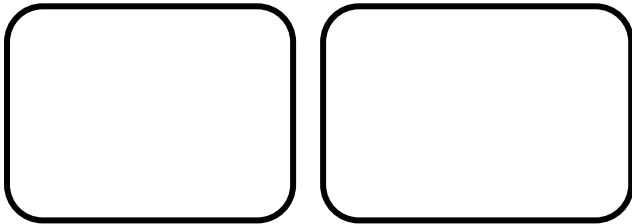

Divide 8 into 2 groups

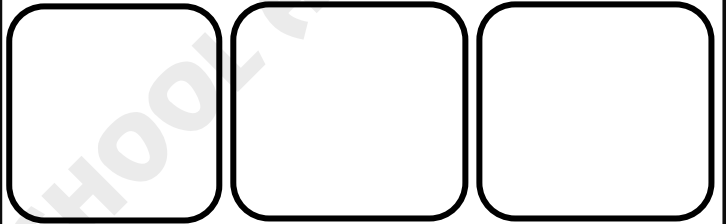

Divide 9 into 3 groups

Divide 10 into 2 groups

Divide 15 into 3 groups

Division

Choose the correct answer

In $18 \div 3$, dividend is

- 18
- 3
- 6

In $10 \div 2$, divisor is

- 10
- 2
- 5

In $16 \div 8$, quotient is

- 16
- 8
- 2

In $19 \div 3$, remainder is

- 19
- 6
- 1

Vertical division

Solve:

$$4 \overline{) 48}$$

Quotient = _____

$$9 \overline{) 90}$$

Quotient = _____

$$8 \overline{) 54}$$

Quotient = _____

$$6 \overline{) 30}$$

Quotient = _____

$$7 \overline{) 28}$$

Quotient = _____

$$5 \overline{) 45}$$

Quotient = _____

$$2 \overline{) 41}$$

Quotient = _____

$$3 \overline{) 18}$$

Quotient = _____

$$7 \overline{) 65}$$

Quotient = _____

$$4 \overline{) 49}$$

Quotient = _____

$$6 \overline{) 60}$$

Quotient = _____

$$7 \overline{) 37}$$

Quotient = _____
